

## Celebrating 108th flight as LLP volunteer pilot

LLP Chairman Robert Benda

Patients & pilots. That's what LLP is all about, and that's why today's board of directors is characterized by the strong presence of men and women who are no strangers to the cockpit.

One of those is our chairman, Robert (Bob) Benda, who in May completed his 108th flight since joining LLP in 2006 as a volunteer pilot. In Bob's Mission 108, he transported patient Erin R., after her treatments at Children's Hospital Colorado, Denver, and her family, back home to Wyoming.

"Providing the best service to our patients and passengers is of key importance to me, and that's why I'm continually training both as a flight instructor and pilot to ensure that my skills stay sharp," notes Bob.

He has earned a BS degree in Aviation Management from Metro State University, Denver, several degrees and certifications in project management, and enjoys Flight Instructor privileges for Single/ Multi-engine, Instrument, Advanced/Instrument Ground Instructor.

In 1981, LLP was founded by Wanda Whitsitt, who earned her pilot's license at age 48 and continues to serve and inspire as Chairman Emeritus. Other LLP directors who are licensed pilots are Nancy Blake, Carson Greene, Petyon Metzler and Andy Zich.

## Thank you

To all those who  
courageously  
gave their lives....  
and all who bravely  
serve today,  
we thank you.
